System Comparison

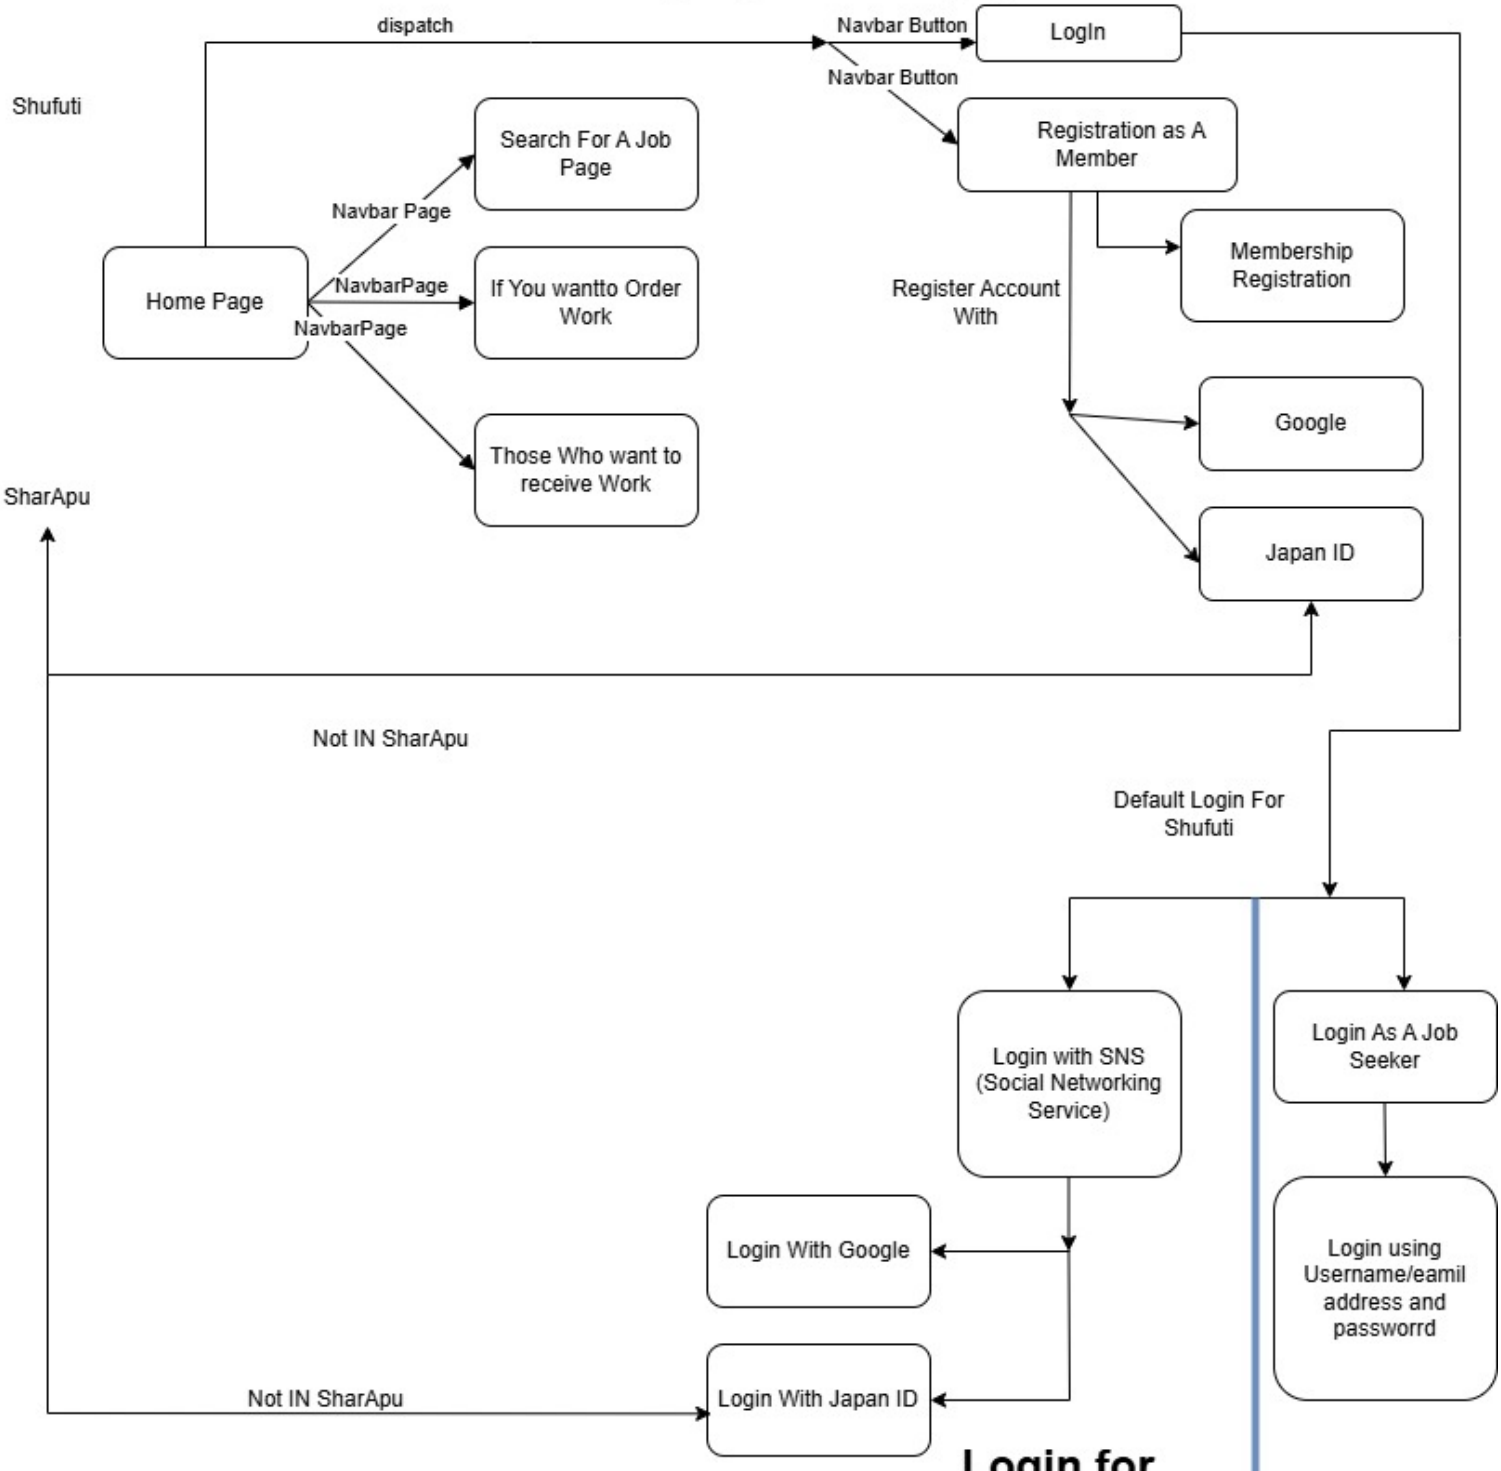
Shufuti VS SharApu

By

Sumaiya Tarannum Noor

(These diagrams will be updated based on task progress and system updates.)

Shufuti vs SharApu (Home Page)



Registration and Login in SharApu

Each Member can Register once in SharApu. Once the registration is done the user can change their role between Job Seeker and Hierer. The defaukt login for SharApu will take the user to Job Seeker Profile. There by choosing "Switch Role" button the user can change their role.

Login for Hierer

In Shufuti Hierer Login is co mpletely dependent on Registration. This is the main difference between Shufuti and SharApu.

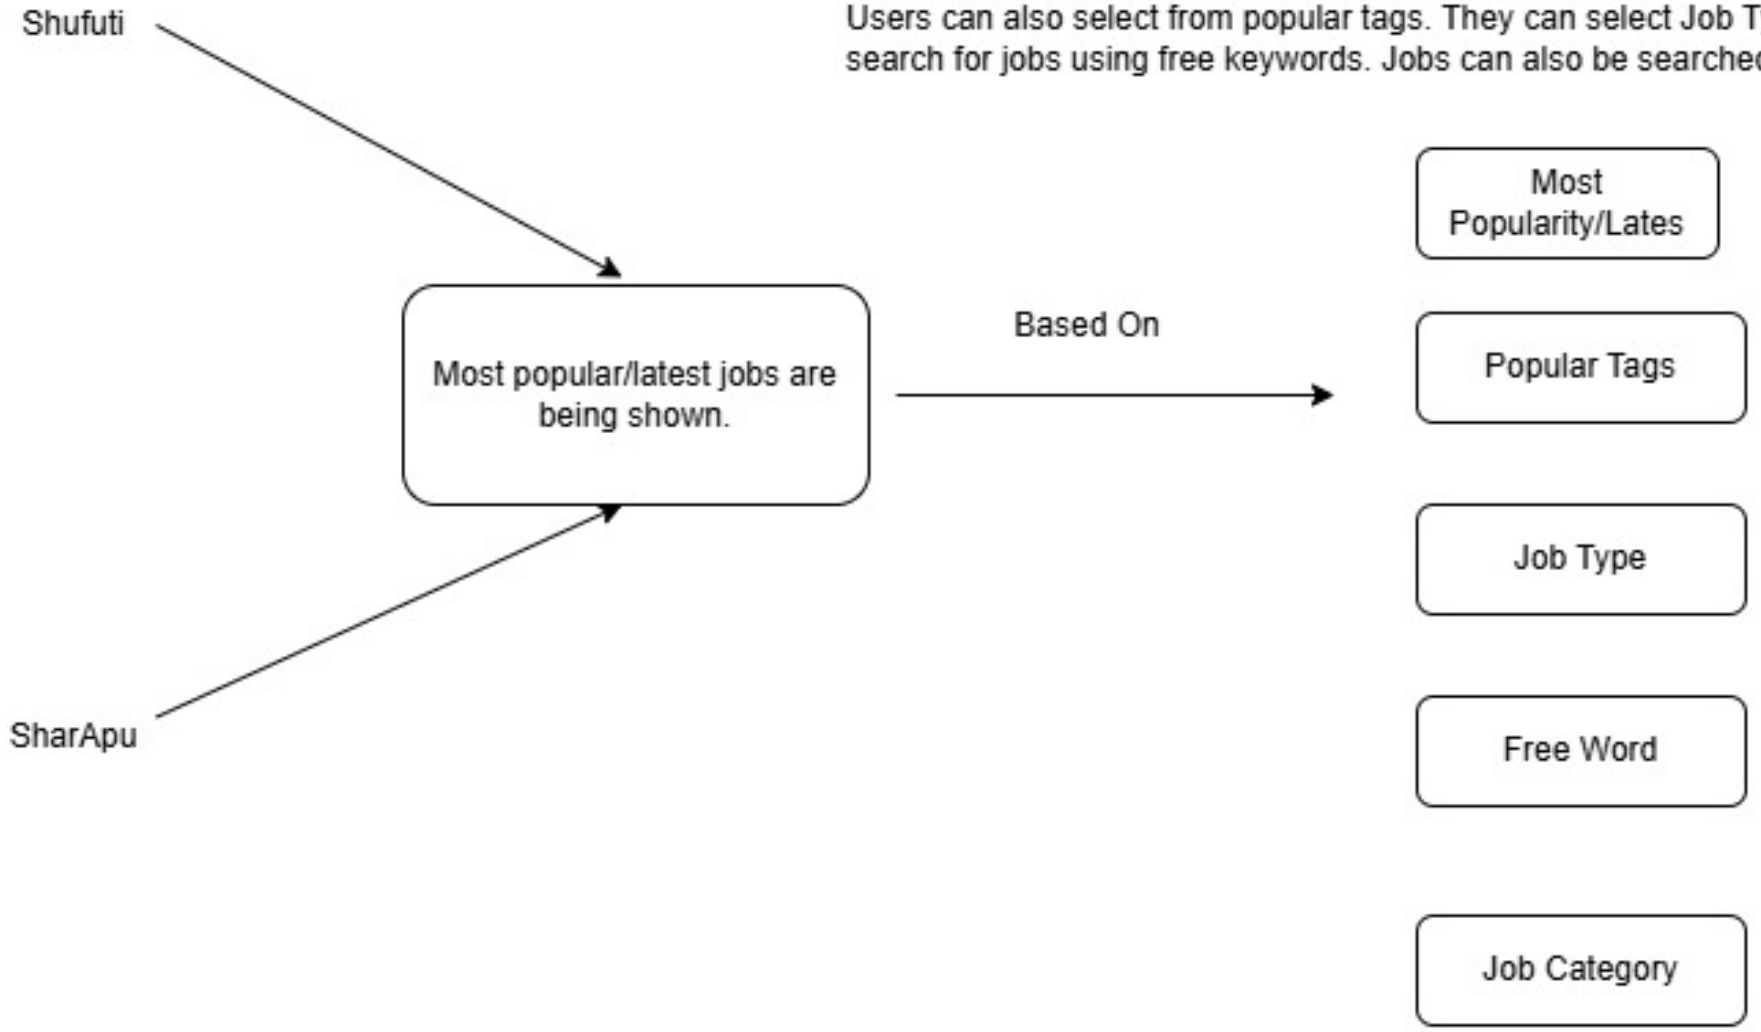
Search For A Job Page

This page is for all the users. The most popular or latest jobs are being shown. Users can also select from popular tags. They can select Job Types. Users can search for jobs using free keywords. Jobs can also be searched using categories.

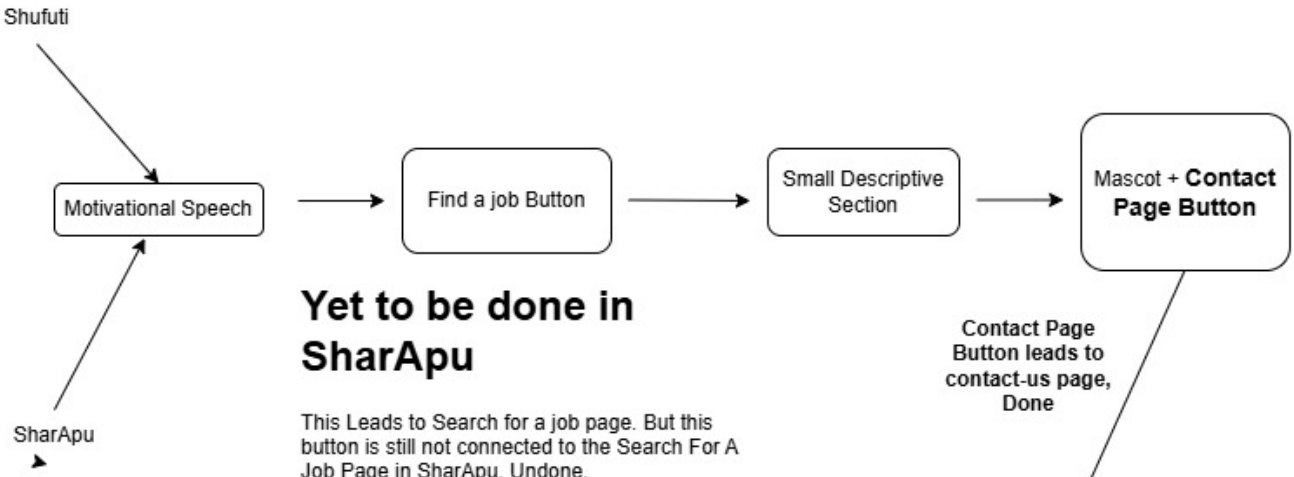


Users Can Search for as many job as they want.

System Comparison - Shufuti vs SharApu

Those who want to receive work page

This page is aimed towards the job seeker community. It is basically a descriptive guide for the job seeker about how they can start finding their suitable jobs.



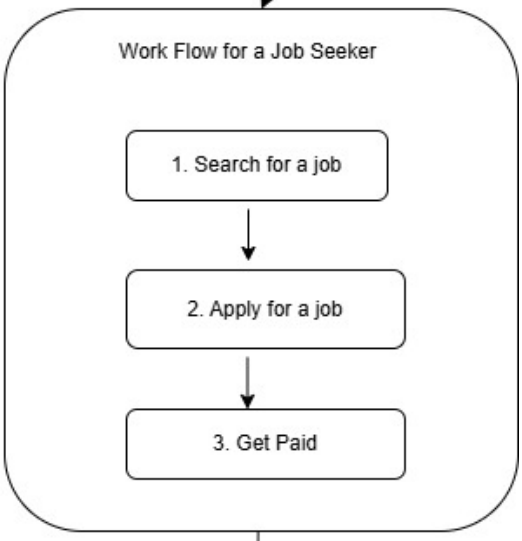
Yet to be done in SharApu

This Leads to Search for a job page. But this button is still not connected to the Search For A Job Page in SharApu. Undone.

Contact Page Button leads to contact-us page, Done

Yet to be done in SharApu

This section shows the work flow for a job seeker. This section is not yet designed in SharApu. Undone.

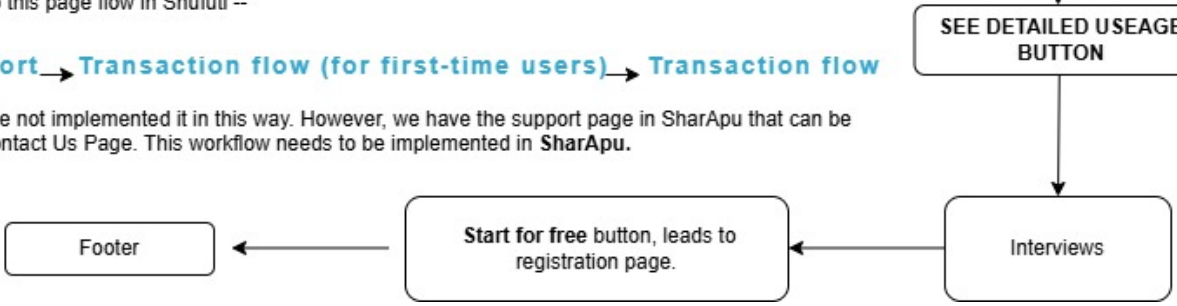


Yet to be done in SharApu

This Button leads to this page flow in Shufuti --

Shufuti Support → Transaction flow (for first-time users) → Transaction flow

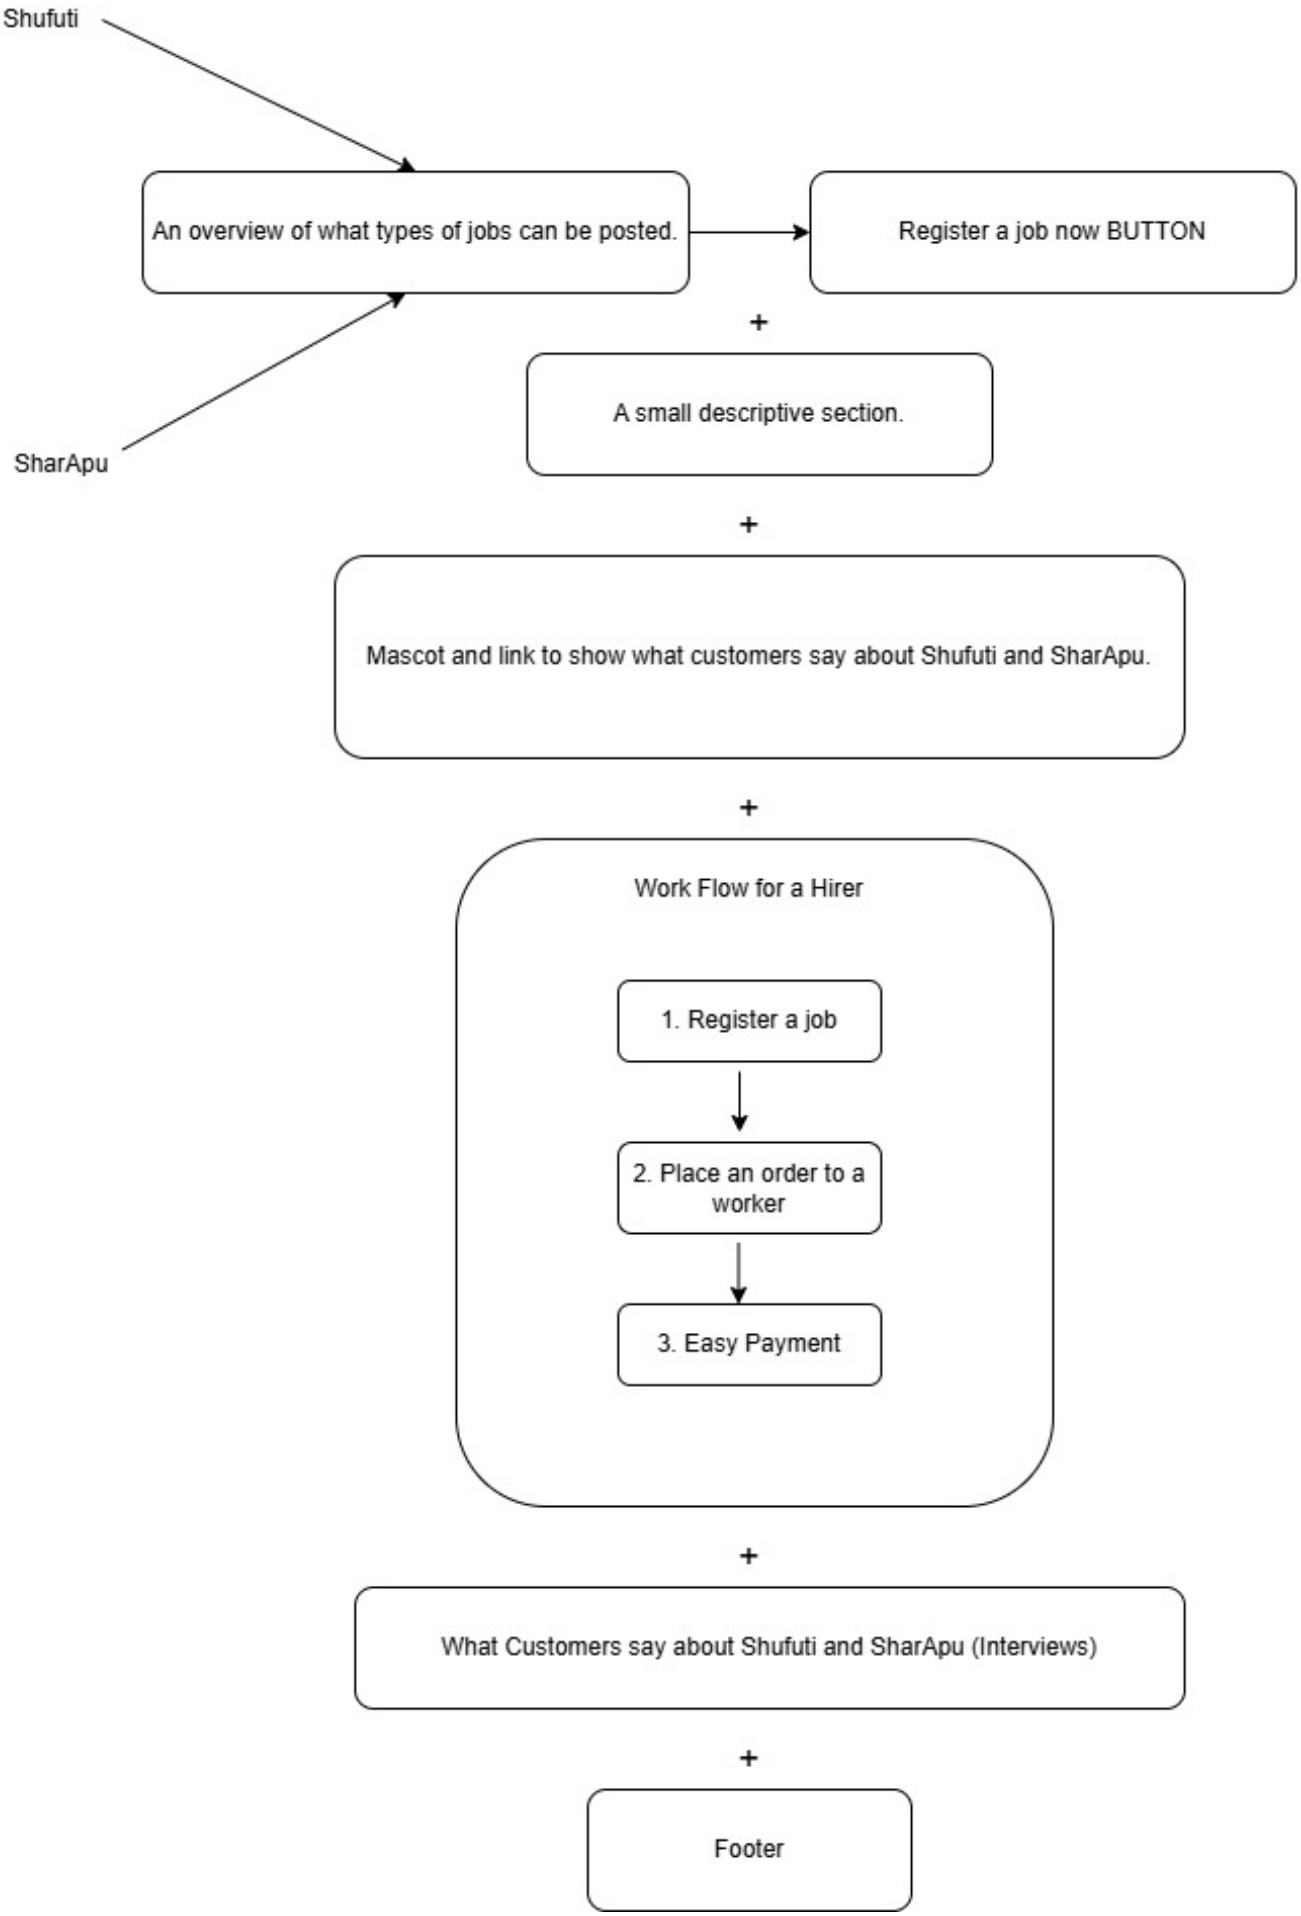
In SharApu we have not implemented it in this way. However, we have the support page in SharApu that can be reached through Contact Us Page. This workflow needs to be implemented in **SharApu.**



System Comparison - Shufuti vs SharApu

If You Want To Order Work Page

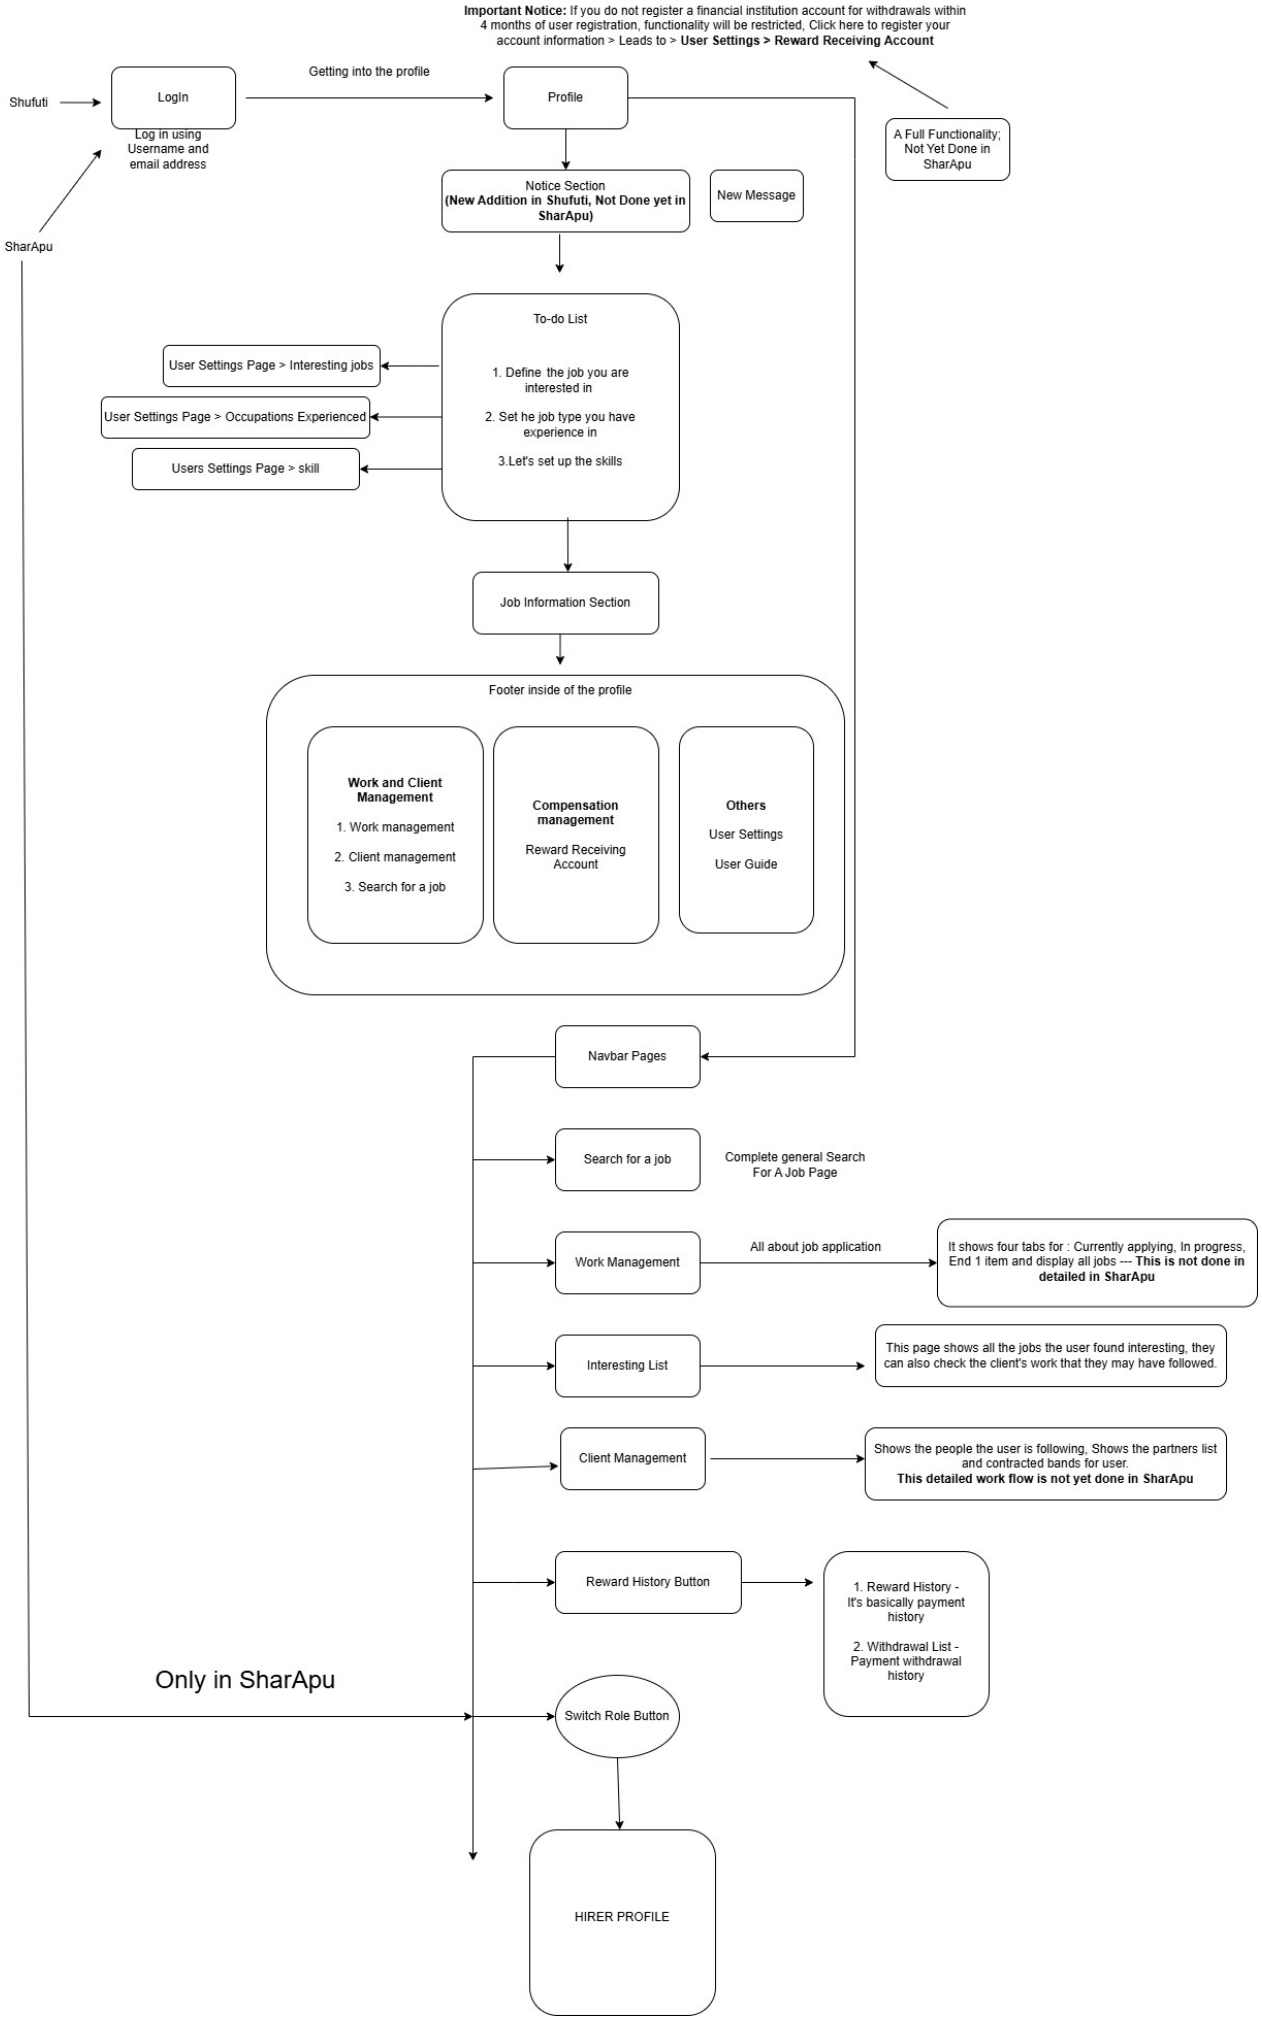
This page is aimed at the hirer searching for the perfect person to finish their project/task. It is like a guide page for understanding the system to find the right candidate.



System Comparison - Shufuti vs SharApu

Logging In

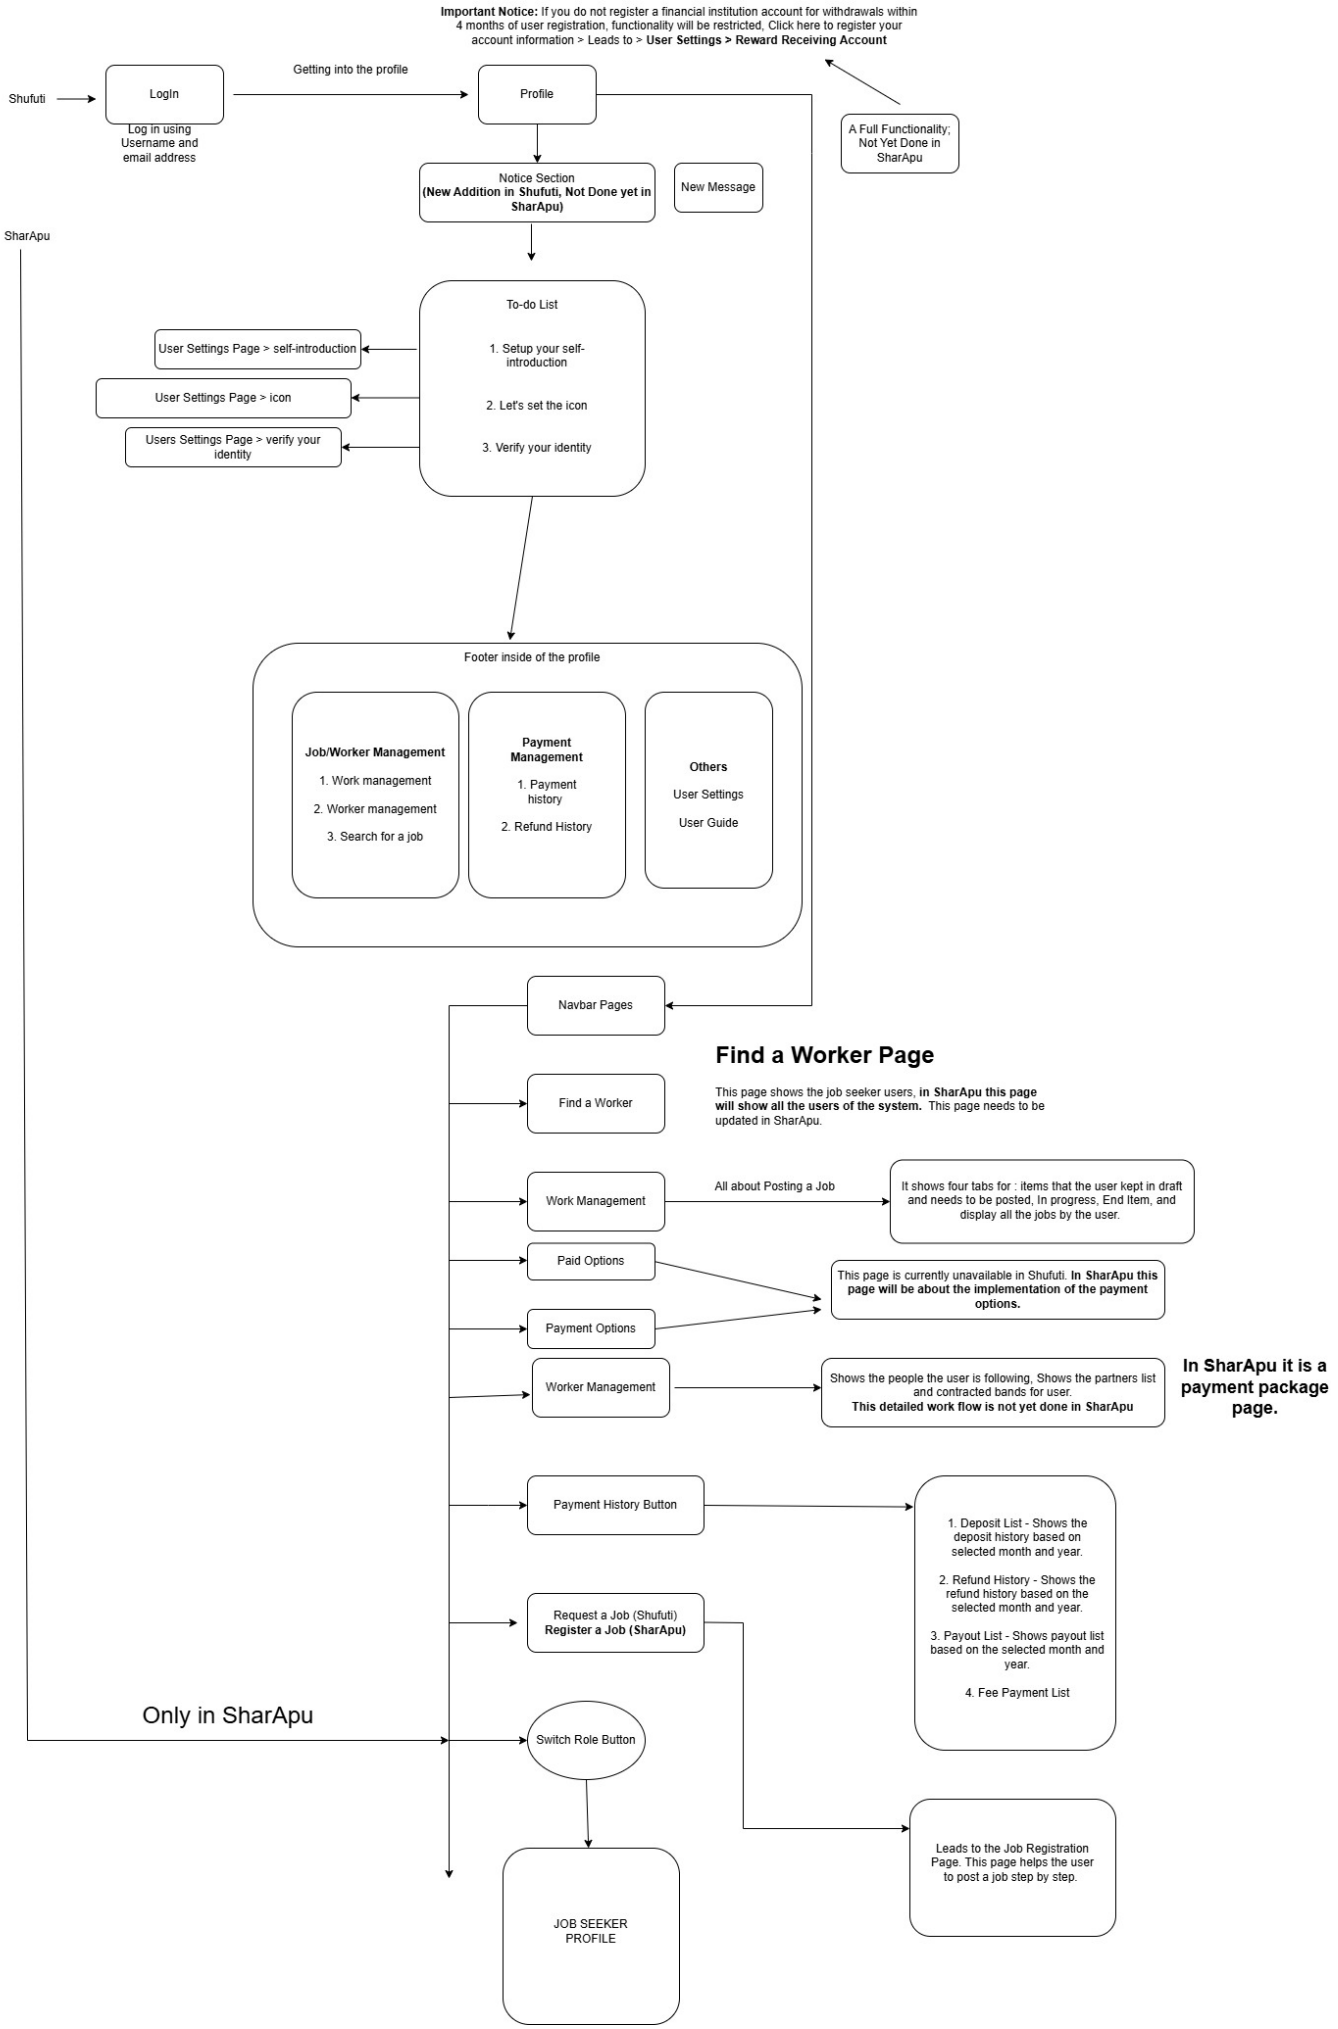
This is one of the key system comparisons between Shufuti and SharApu. In Shufuti, after logging into the system, the user is generally led to a job seeker profile. To get into the hirer profile, Shufuti needs to depend entirely on the registration system. However, in SharApu, this is much easier as a user only needs to register once.



System Comparison - Shufuti vs SharApu

Logging Into Hirer Profile

This is one of the key system comparisons between Shufuti and SharApu. In Shufuti, after logging into the system, the user is generally led to a job seeker profile. To get into the hirer profile, Shufuti needs to depend entirely on the registration system. However, in SharApu, this is much easier as a user only needs to register once.



Find a Worker Page

This page shows the job seeker users, **in SharApu this page will show all the users of the system.** This page needs to be updated in SharApu.

In SharApu it is a payment package page.

Applying For A Job Page

This is the dedicated page for applying for a job. The designs of Shufuti and SharApu are quite different. However, the fields are similar.
